NodeJS Framework

ExpressJS's routes, models, controlelrs

called Express's routes

provide database access

provide authentication

Angular 2

MongooseJS

PassportJS

provide generated views

provide actual database

MongoDB

Client Website

```html
<html>
  <head>
    ....
  </head>
  <body>
    ...
    <div id = RsvpBook's id />
    <script>
      /*
      pull Angular 2 script from our server to populate the <div id = RsvpBook's id>
      */
    </script>
    ...
  </body>
</html>
```
